Rocker Switches

The CH4x4 Rocker Switch is a single throw ON – OFF switch designed to operate your 12 - 24 volt accessories such as lights, air compressor, power inverters, winches and more.

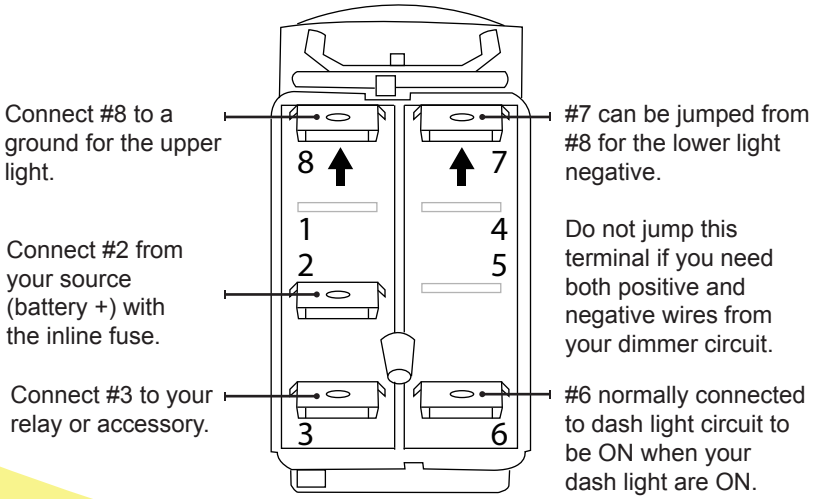

These switches are vibration, shock, thermoshock, moisture and salt spray resistant.

All symbols are laser etched directly onto the switch face to ensure long image life. We do not use stickers or ink which will wear off in a very short time.

FEATURES

- Single Pole - Single Throw ON-OFF switch
- Black hard surface rocker
- Two LED in the switch
- Upper LED is ON only when the switch is turned ON
- Lower LED is independent
- Both LED have separate grounds
- Same size as the Carling and ARB switches
- Rated 20A 12V - 10A 24V
- No rear barriers between terminals
- Wiring diagram supplied with switch
- This is a 5 terminal switch

Rocker Switches

Momentary Series

Rocker Switches

CH4x4 Rocker Switch Momentary Series is a double throw momentary switch (returns to center position by the spring) designed to operate your Winch or Air Horn.

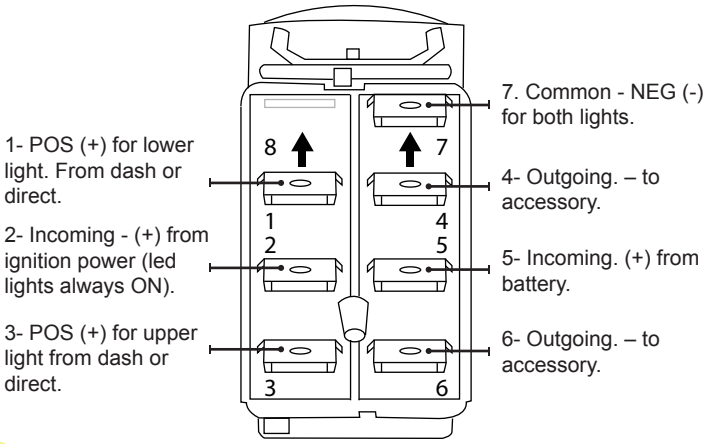

These switches are vibration, shock, thermoshock, moisture and salt spray resistant.

All symbols are laser etched directly onto the switch face to ensure long image life. We do not use stickers or ink which will wear off in a very short time.

FEATURES

- Double Pole Double Throw MOMENTARY switch
- Black hard surface rocker
- Twin upper and Single lower incandescent lights
- Upper lights are ON when the switch is pressed UP
- Lower light is ON when switch is pressed DOWN
- Same size as the Carling and ARB switches
- Rated 20A 12V - 10A 24V
- No rear barriers between terminals
- Wiring diagram supplied with switch
- This is a 7 terminal switch

WIRING DIAGRAM

Notes: This is a dual lighted switch with tab #7 being a common ground for the upper and lower led lights. DO NOT CONNECT TABS #1, #2, #3 to a positive it would short circuit switch.

Tabs #1 and #3 will light up switch if connected to the dash/ignition lights and they will stay ON when press or activated, if you only connect tab #2 to ignition it will stay ON always.

Rocker Switch Panel Bracket

with Digital Voltmeter for Jeep Wrangler JK 2007-2015

Rocker Switch Panel Bracket

with Digital Voltmeter for Jeep Wrangler JK 2007-2015

CH4x4 Industries introduces its total new and exclusive rocker switch panel bracket with digital voltmeter, specifically designed and engineered for the Jeep Wrangler JK (2009-2015). This bracket will allow you to mount up to 6 rocker switches, there is no need of cutting, drilling or modifying your existing vehicles. This bracket allows you to add more accessories to your vehicle without the hassle of drilling holes to mount switches or even cutting parts of your dash, just to insert that light switch that you need, it works well with left hand drive or right hand drive jeeps.

It also includes a Digital Voltmeter that will keep you informed of your actual voltage from the comfort of your seat.

CH4x4 Rocker switch panel bracket with digital voltmeter is the perfect complement to all of our new line of rocker switches.

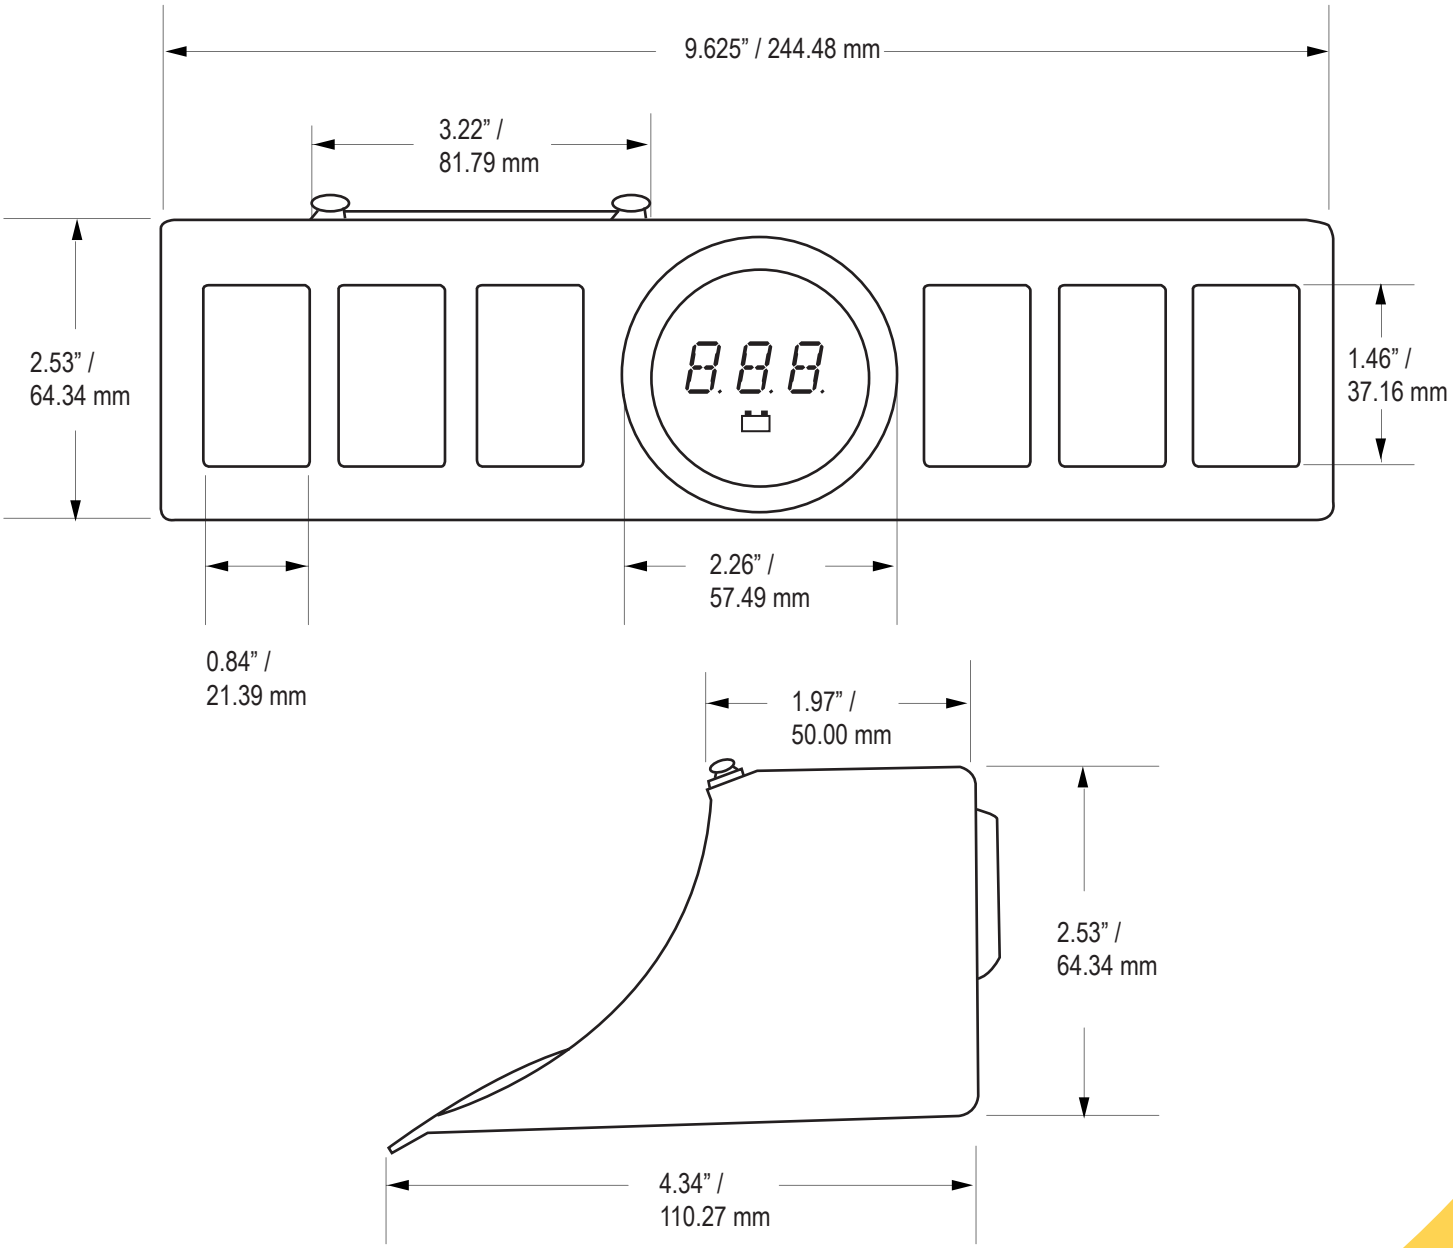

Part Number: CH4X4-RSPB-JK

FEATURES

- Panel has capacity for 6 Carling style switches
- Exclusively designed to fit all Jeep Wrangler JK 2007-2015 without any trimming or cutting of any kind
- Made out of rugged steel with a long lasting black texture powder coating paint
- Comes with a 12/24v digital voltmeter for your convenience
- All required mounting hardware included
- Rocker Switches, Connectors and Wiring Harness are not included in the Bracket
