Departing Japan

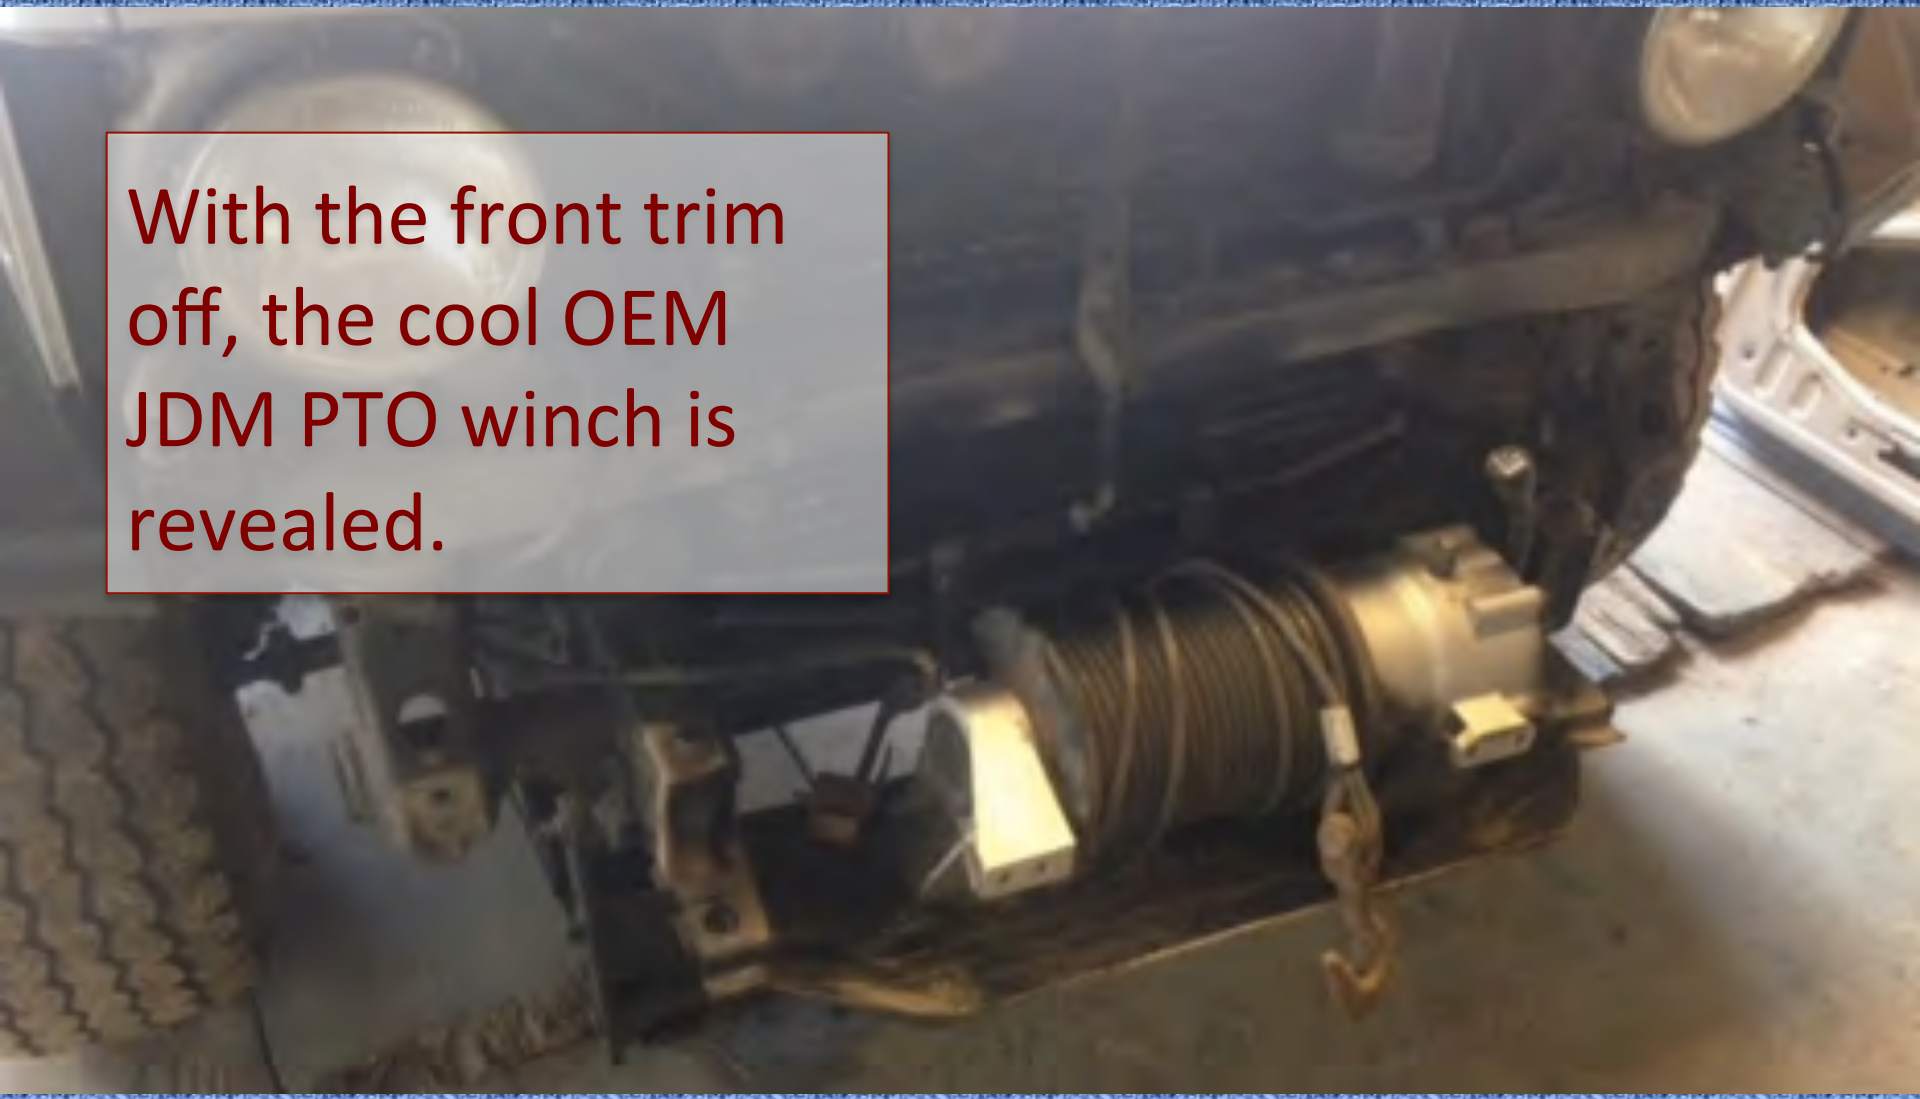

Completed build

Introduction

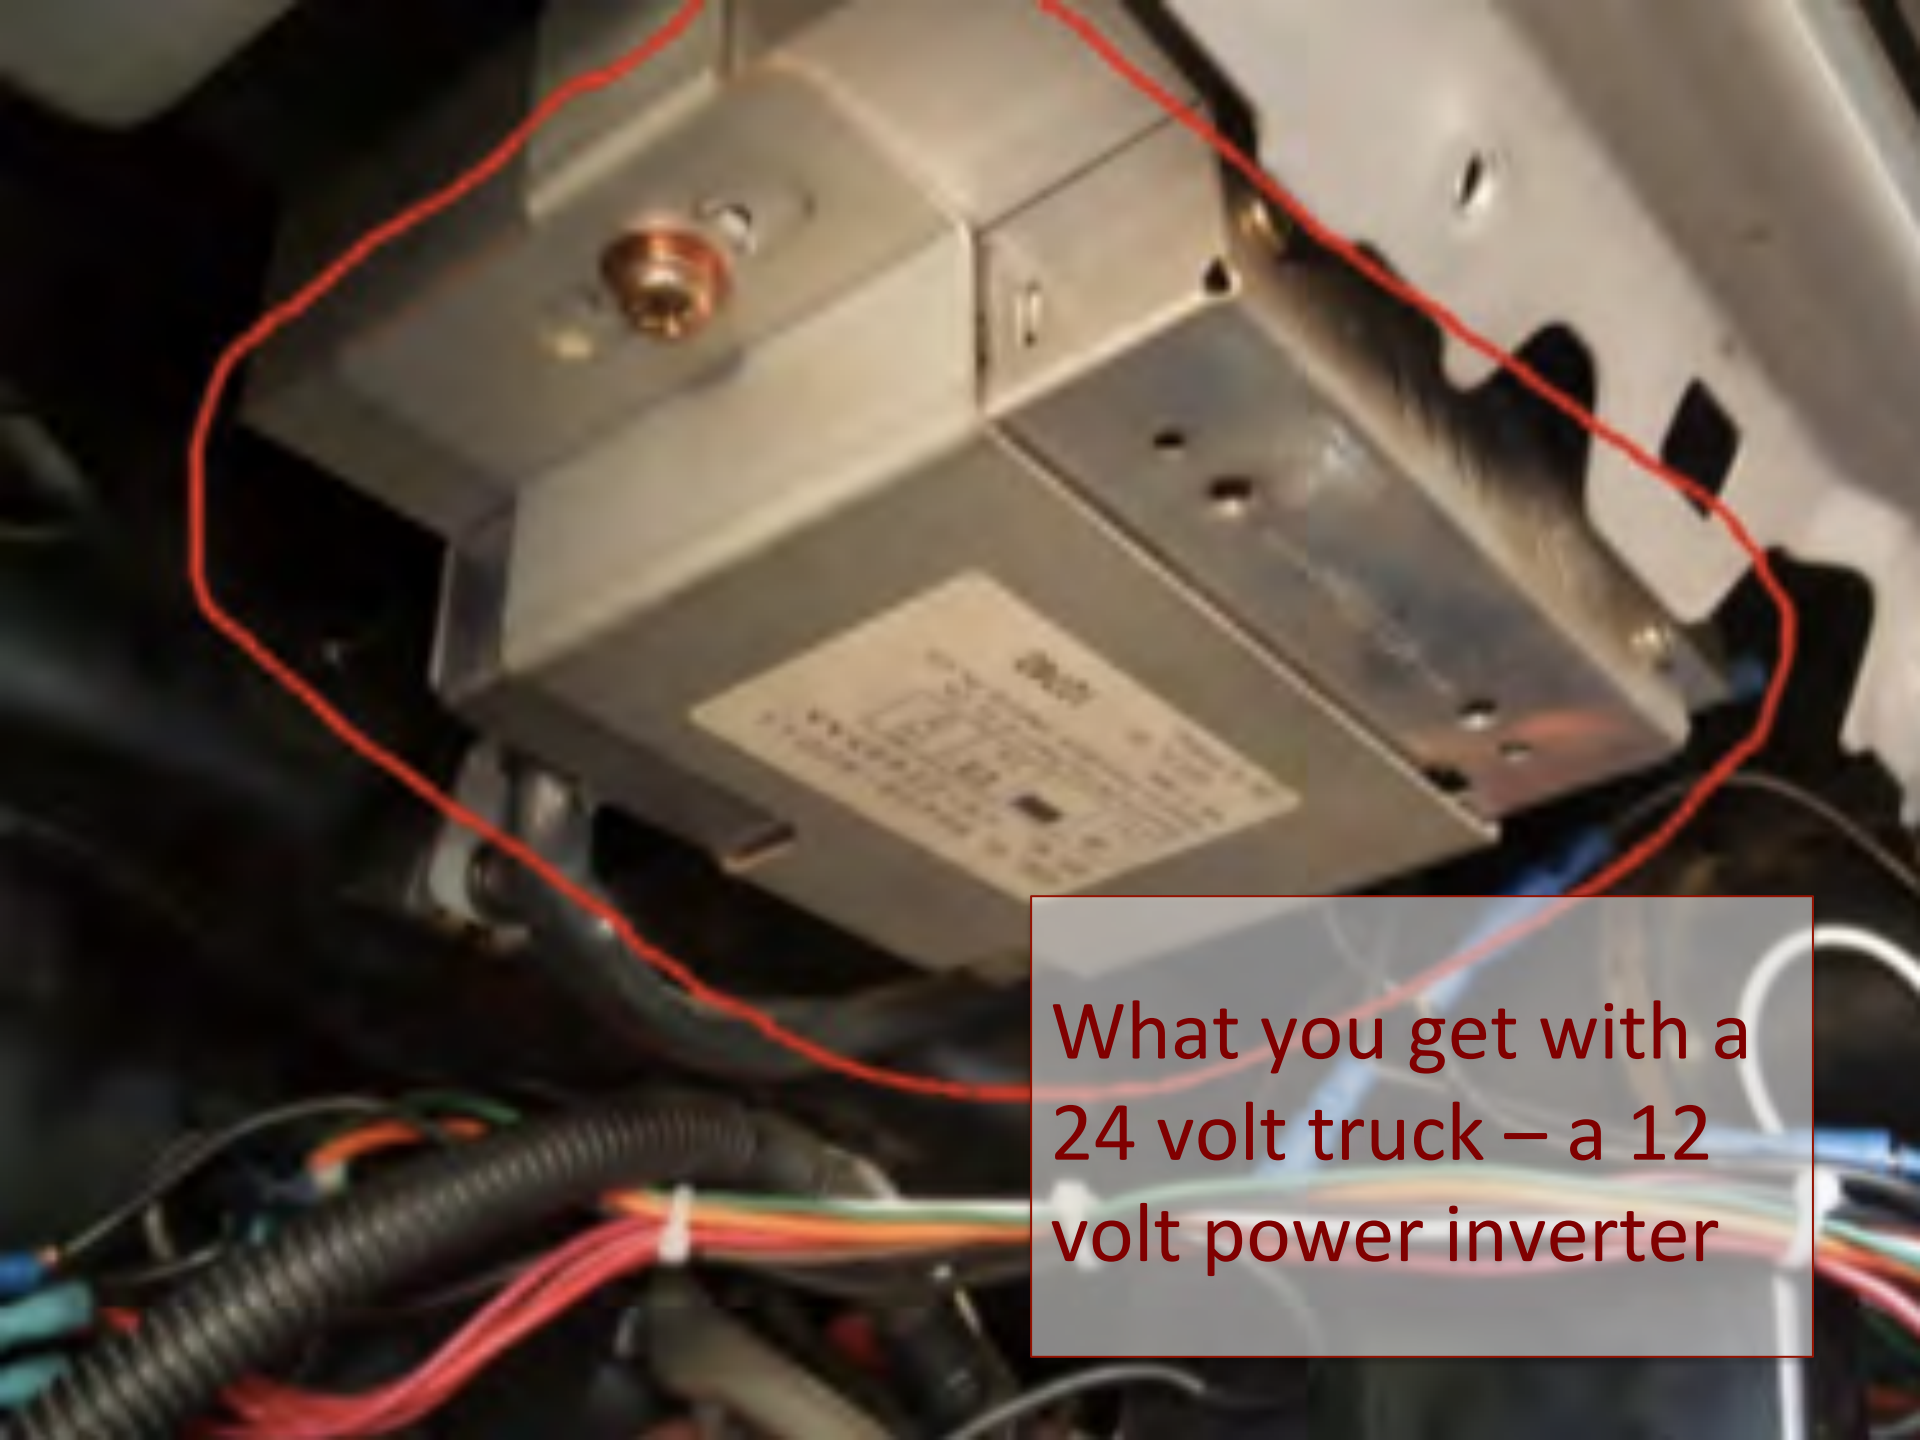

Cool stuff you get with a JDM truck…..
even stuff you don't really want!

With the front trim off, the cool OEM JDM PTO winch is revealed.

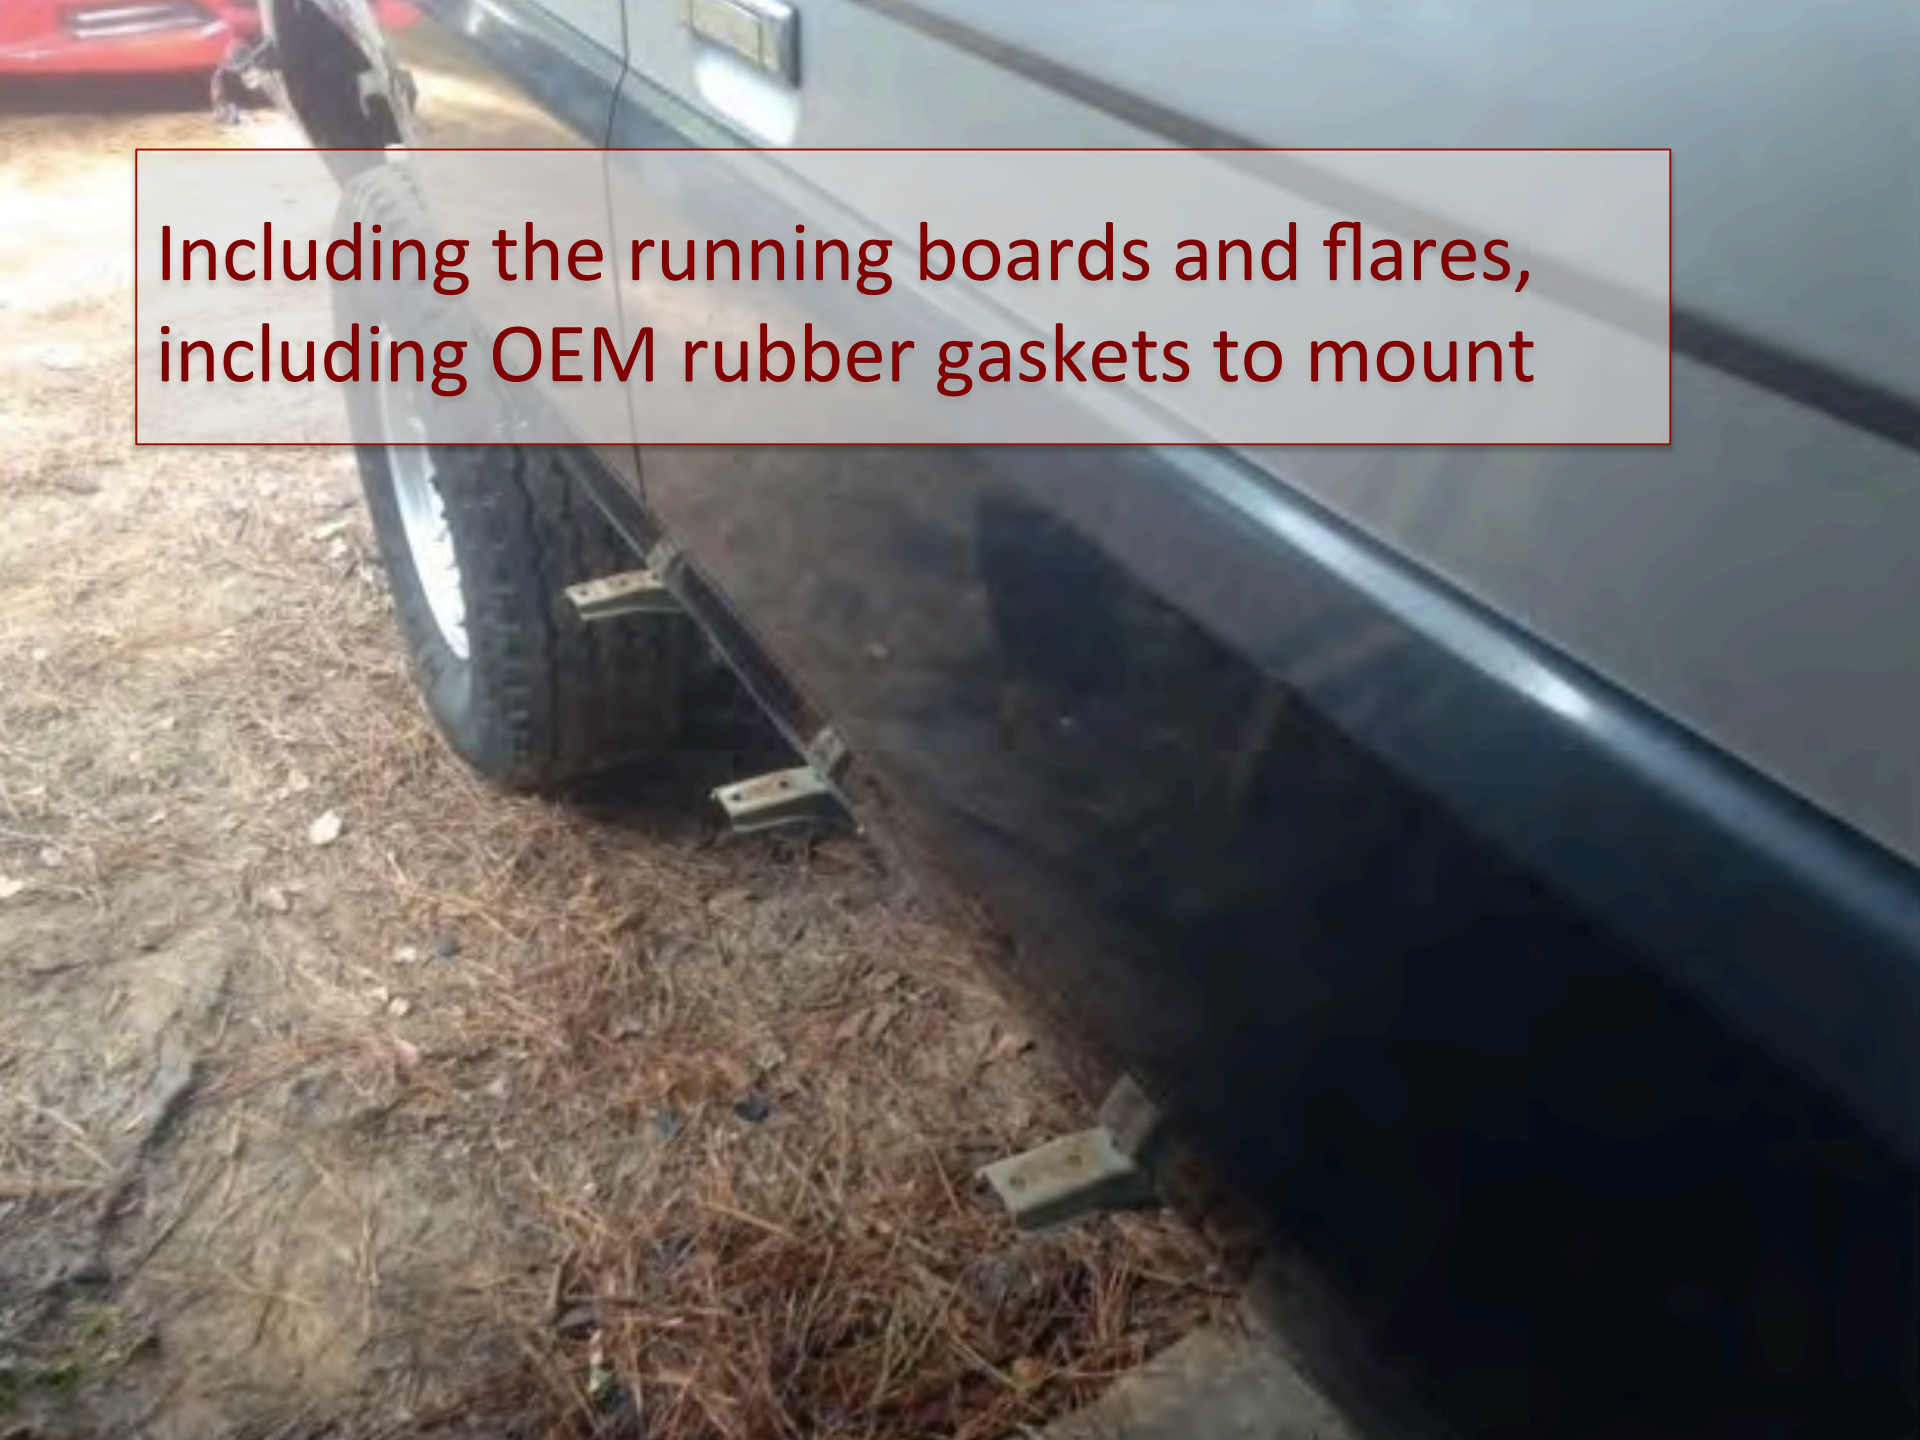

The holy grail of Toyota seating – bouncy seats!

OEM ELockers!

What you get with a 24 volt truck – a 12 volt power inverter

Body / Cosmetics

Looked good in the Japan photos, but PO was not a great parker – Rob had to do some manual rehab

Including the running boards and flares,
including OEM rubber gaskets to mount

Lots of parking trauma, so a light sand and paint

Rob’s wizard work product….

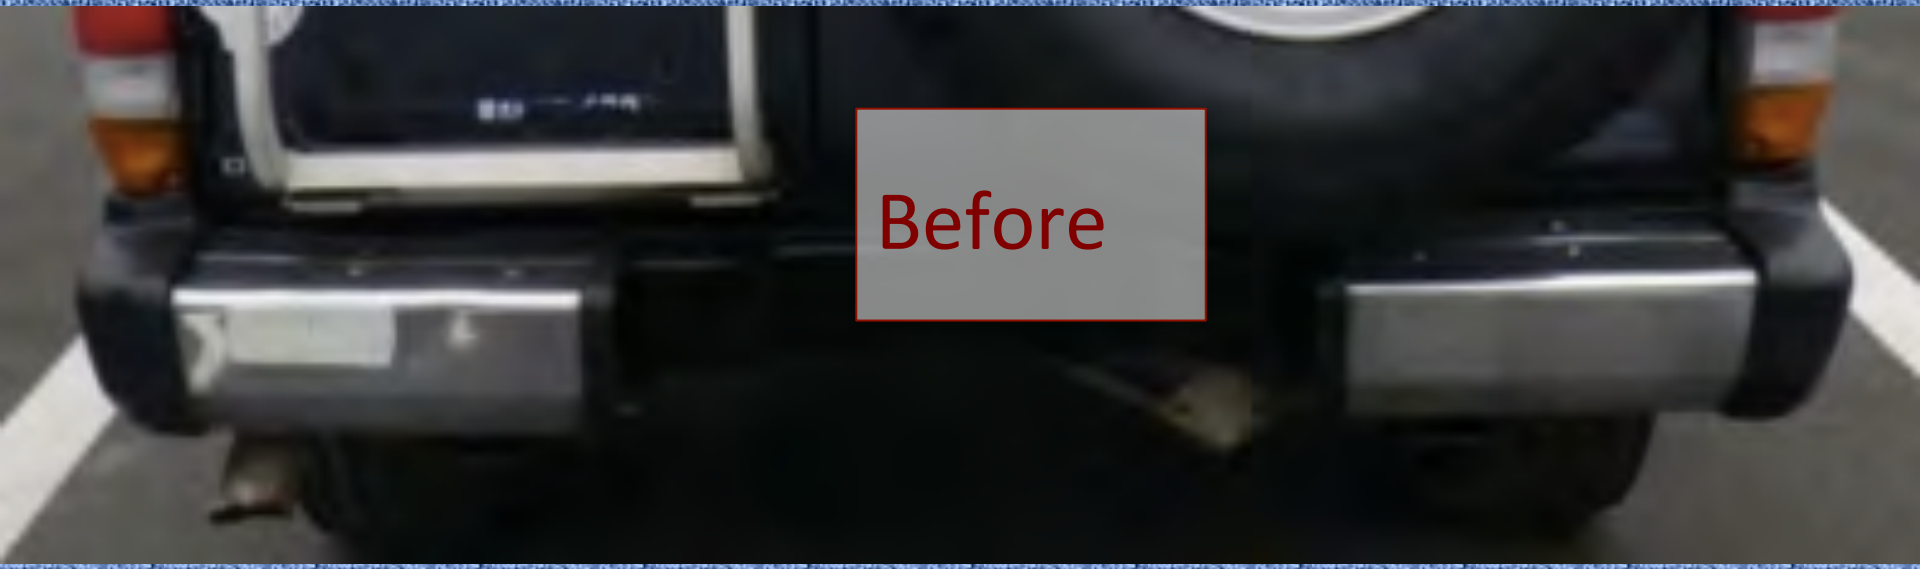

Onur care package….

A clean, well-lit place……

Just like new……

Fully lit……

Ouch…..

New lenses

Trucklights and LEDs

LED light bar on curved front rail of Rob’s roof rack

New rear bumper shell with LED reverse lights and rehabbed end caps

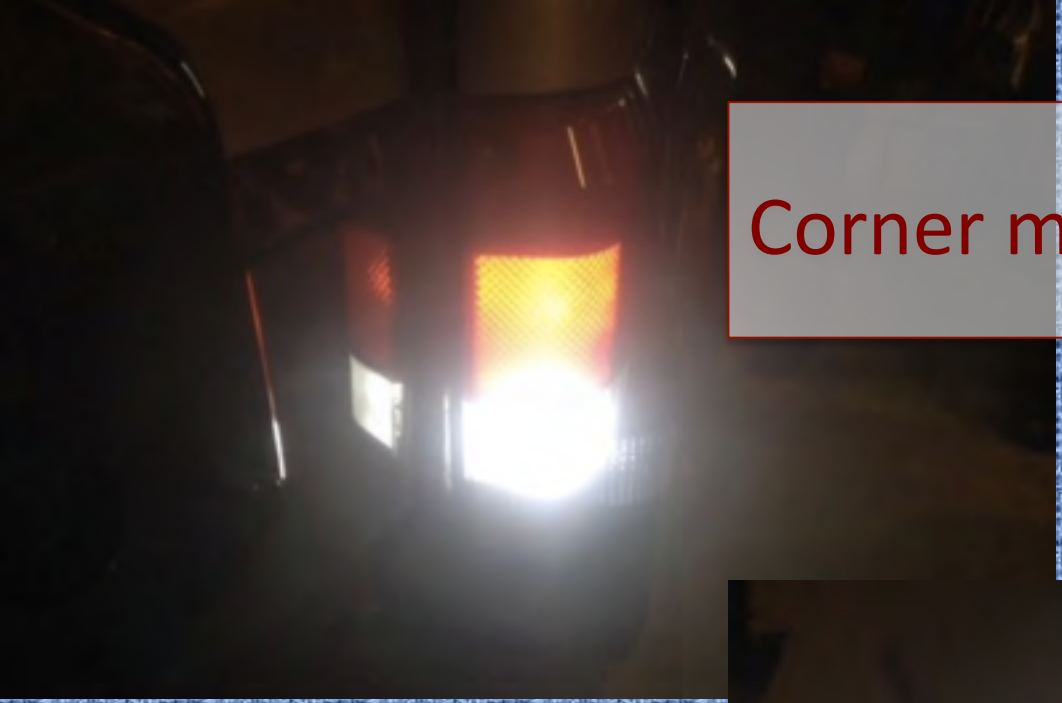

New rear bumper shell with LED reverse lights and rehabbed end caps

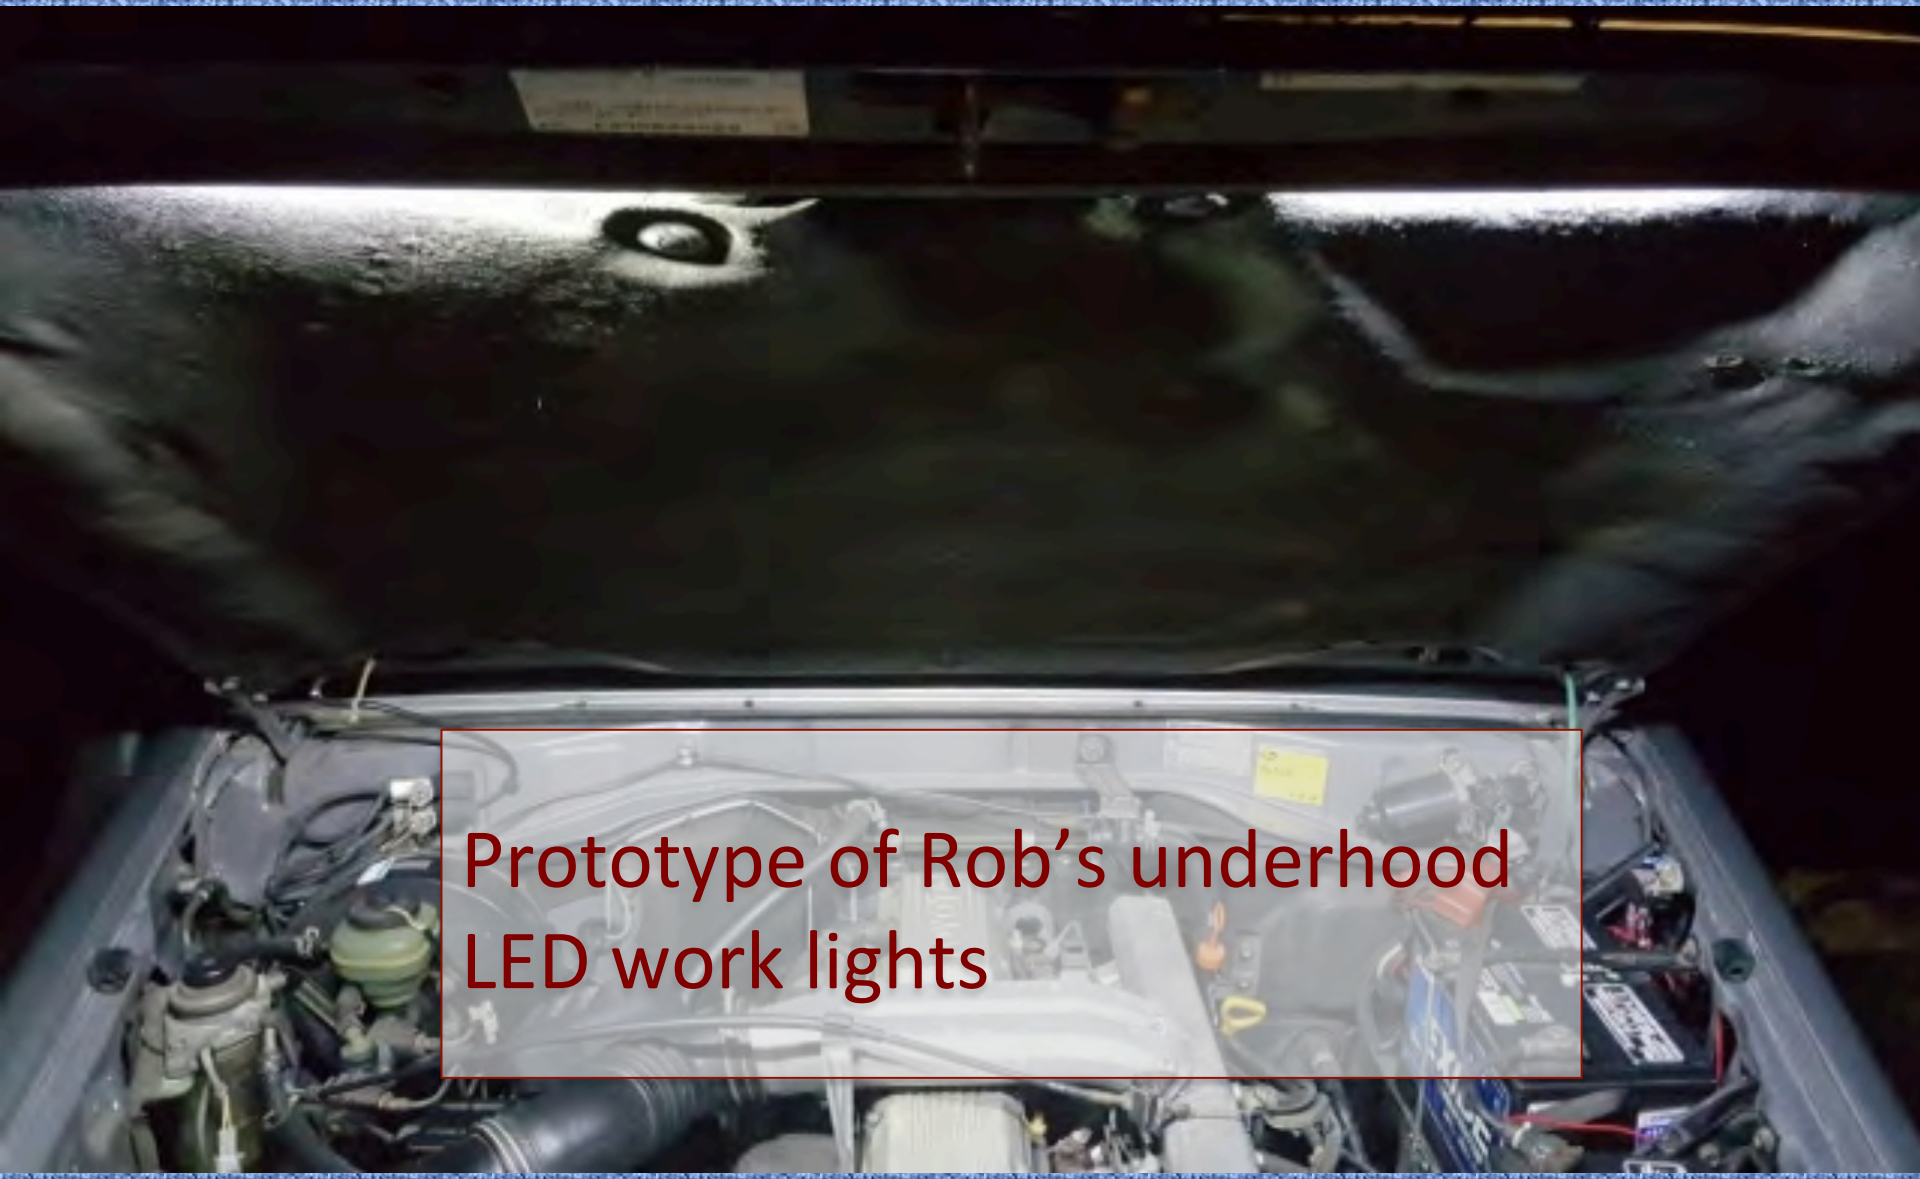

New rear bumper shell with LED reverse lights and fancy tire cover

Corner markers with LED bulbs

Prototype of Rob’s underhood
LED work lights

Rob's planning and layout skills / efforts pay big dividends when executed

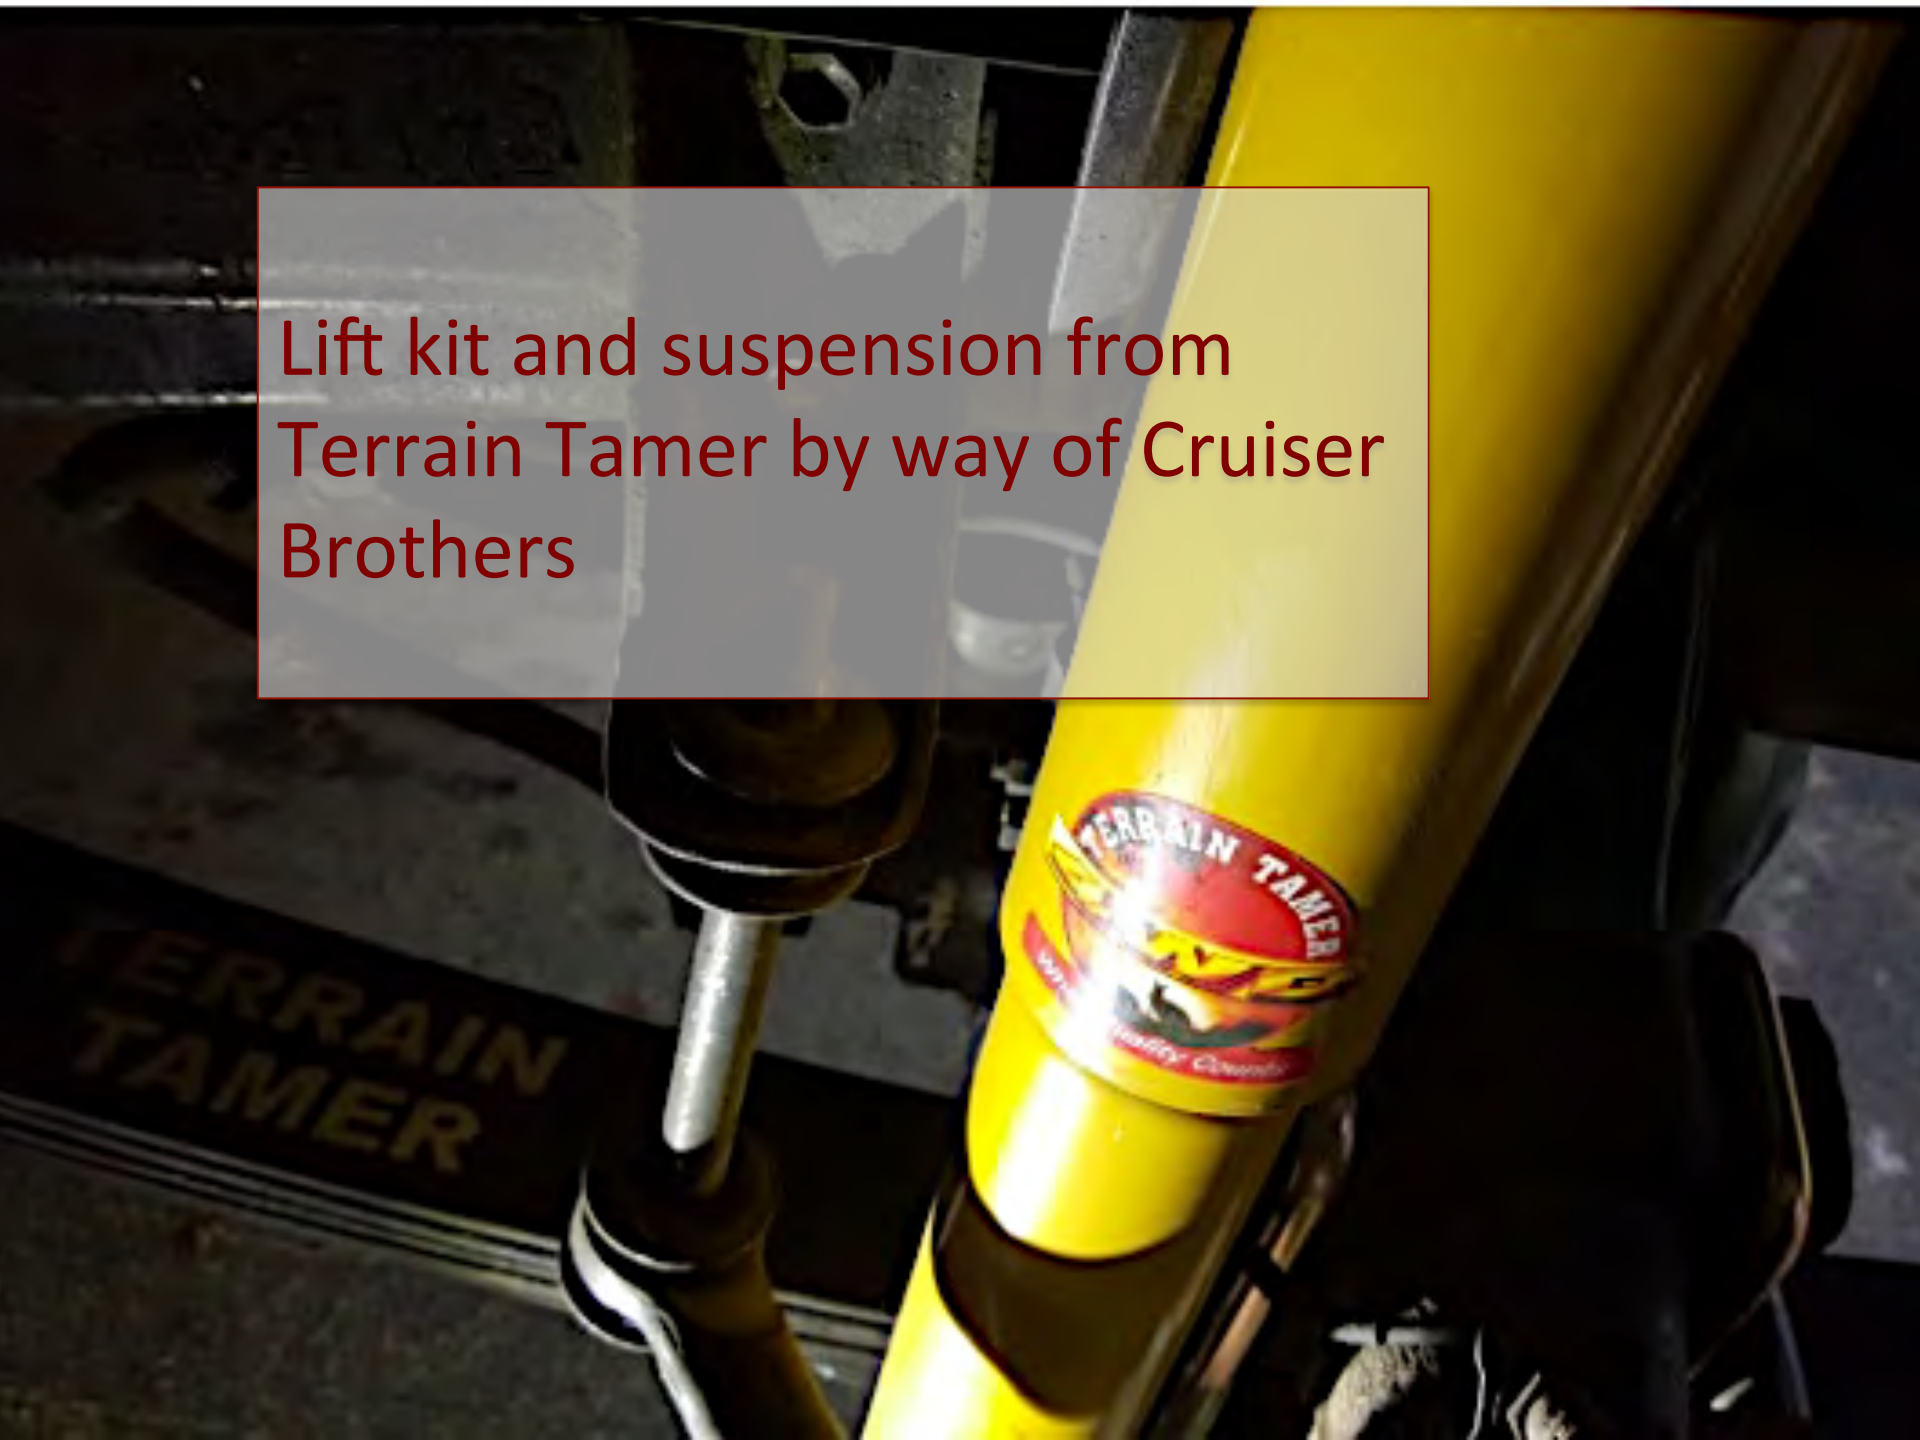

Rob's production LED dome lights

Trucklights on a clean rig

Suspension

Lift kit and suspension from Terrain Tamer by way of Cruiser Brothers

ALL-TERRAIN

JNC660

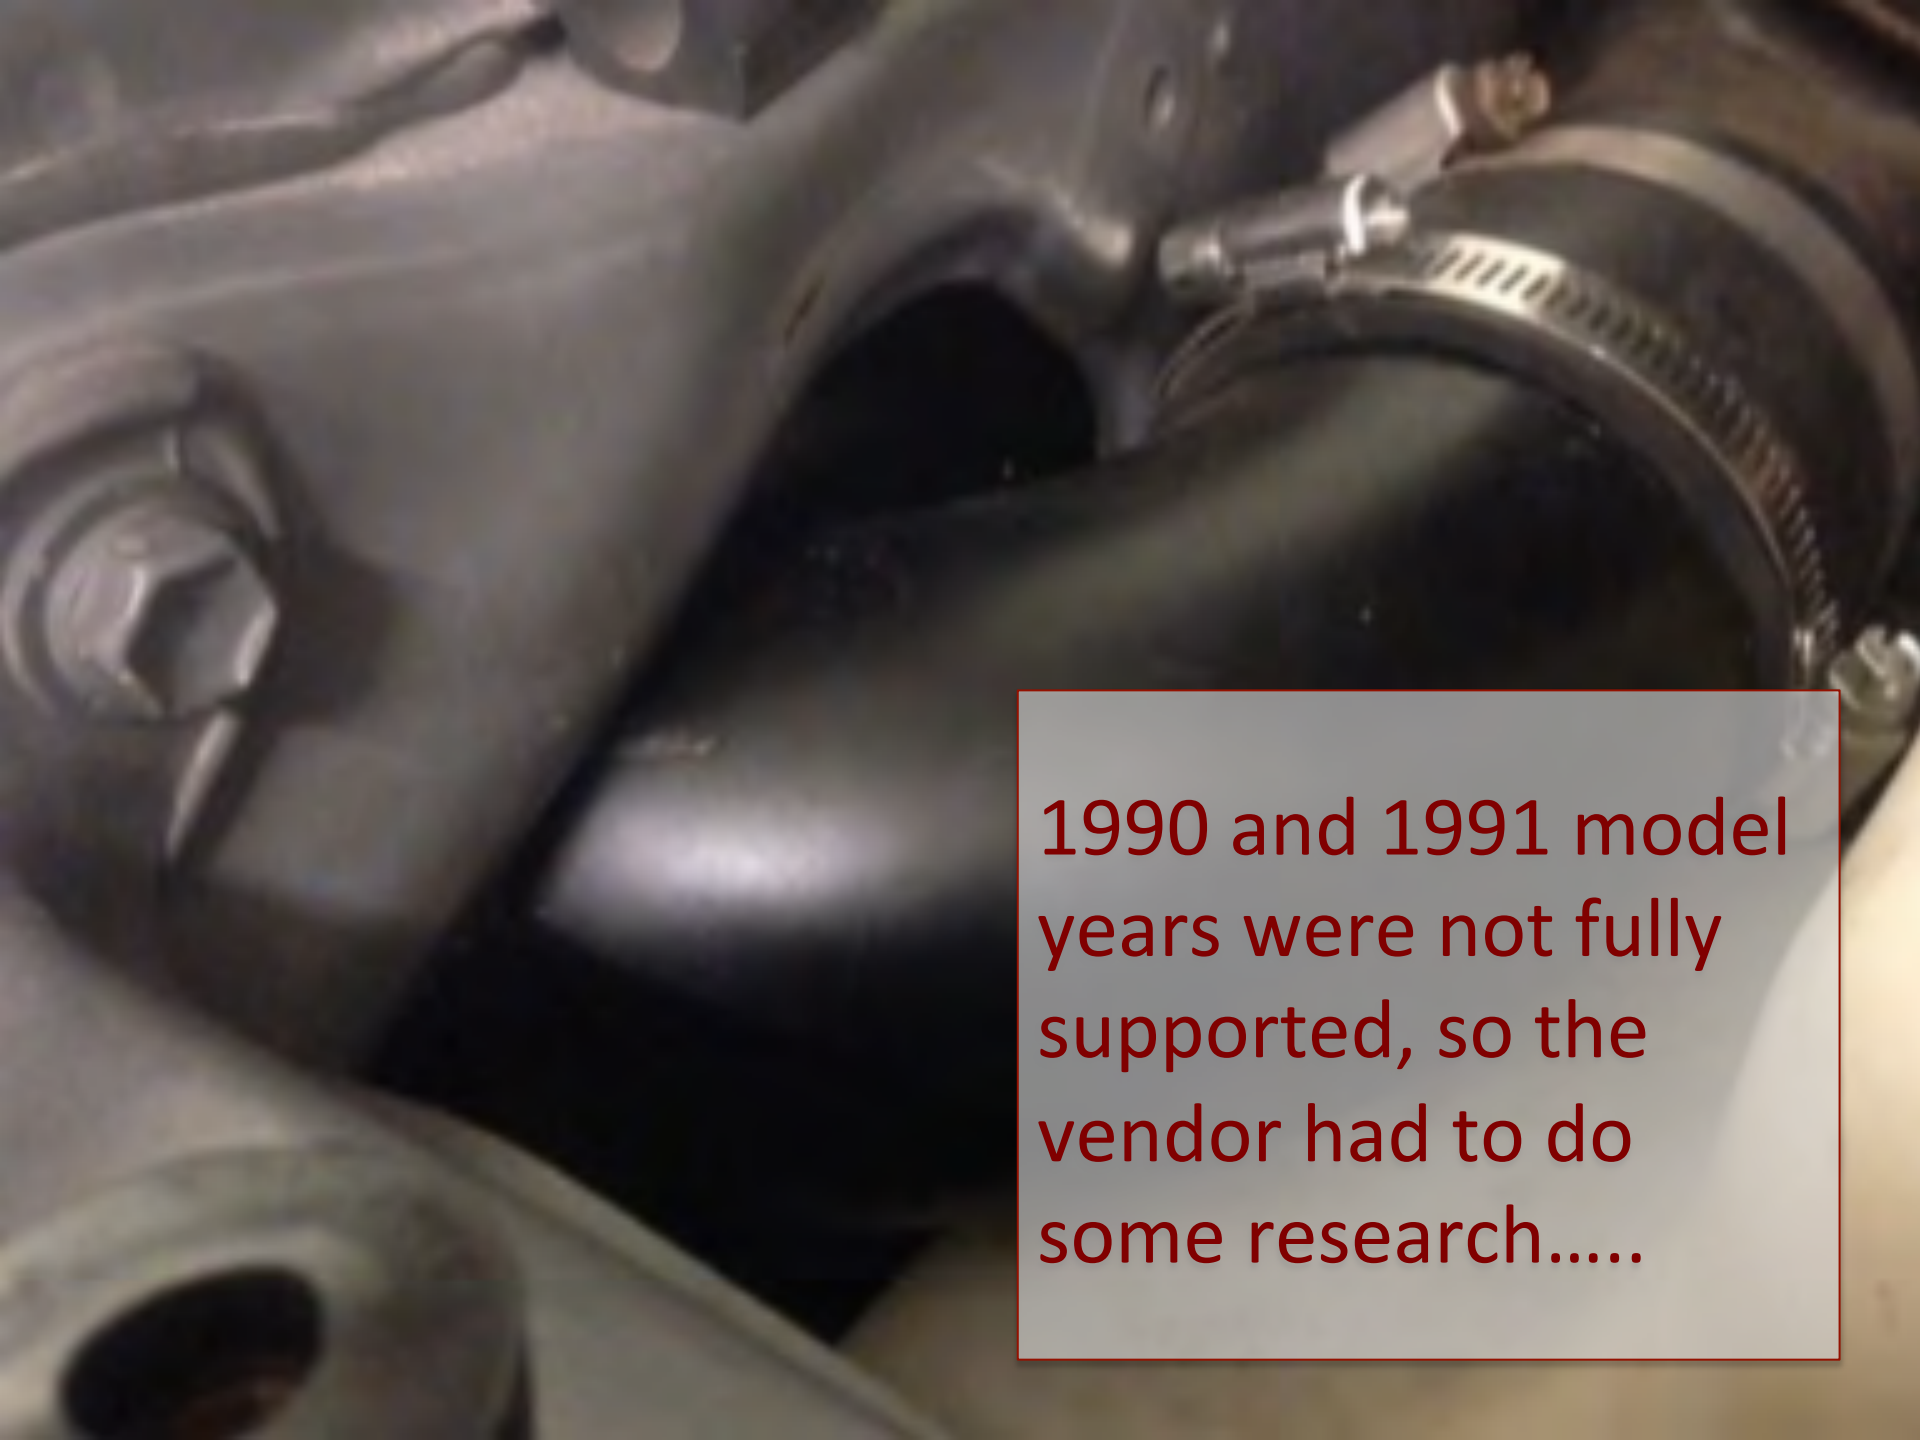

Snorkel

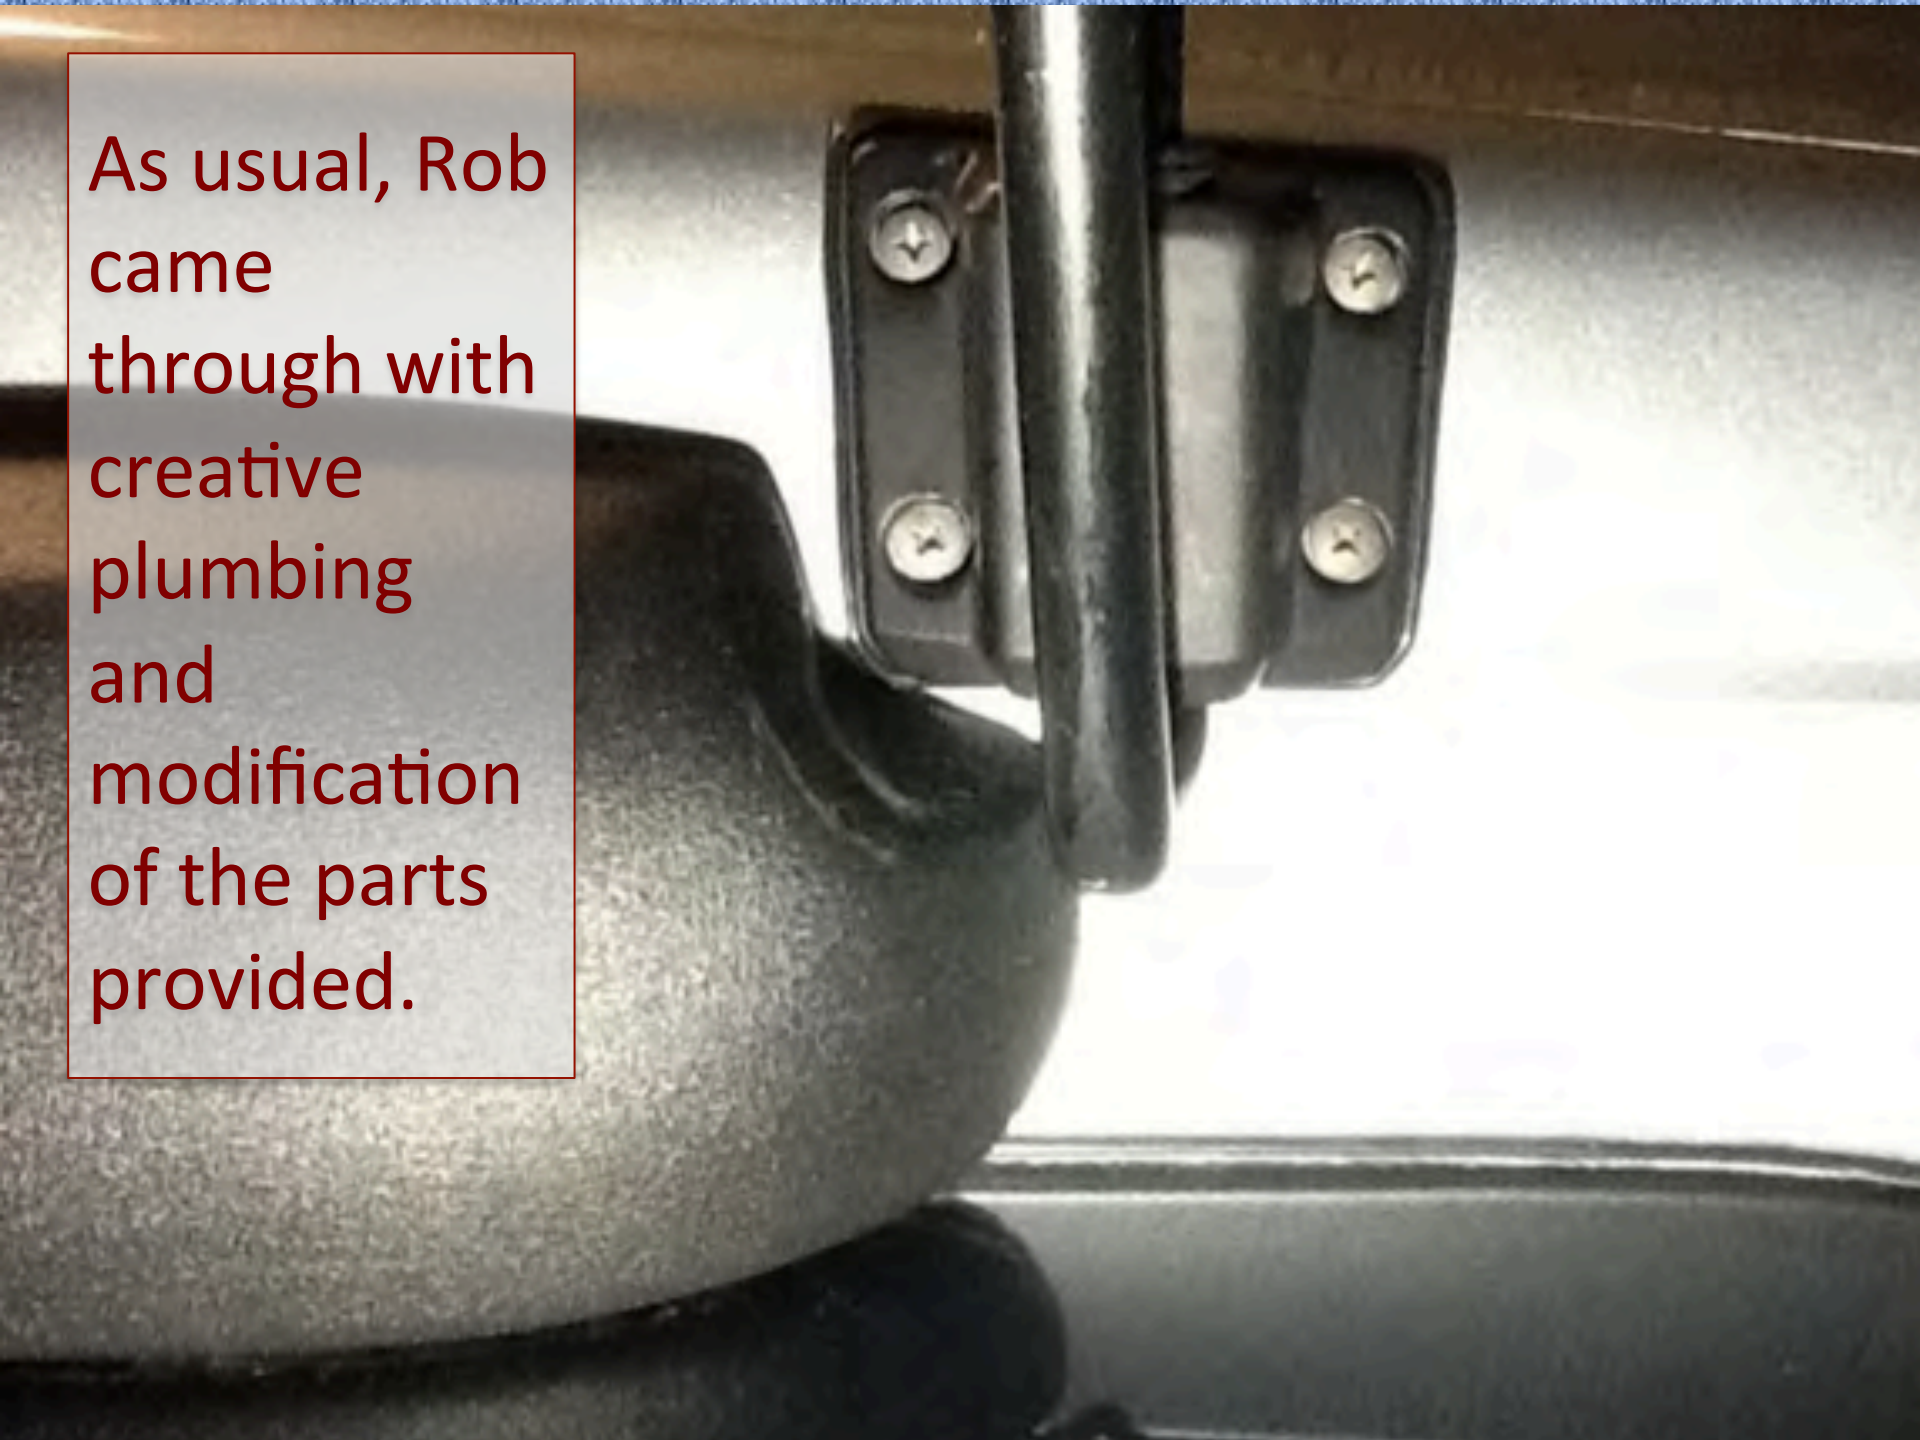

Capably sourced from Cruiser Outfitters, but Safari needed some help to get tall of the right parts over here.

1990 and 1991 model years were not fully supported, so the vendor had to do some research…..

As usual, Rob came through with creative plumbing and modification of the parts provided.
