ABOUT THIS NEW PRICE SHEET...

New Products - there are 62 new part numbers, most of which are new products for various Toyota models such as the 1984 4WD Pickup, 4WD Tercel, and FJ-60 Stationwagon. While these new items will appear in the 1984 catalog, many are available at the present time.

Retail Price - Downeys retail price is not an erronious three step distribution inflated figure, but the actual competitive selling price within the trade area.

Export Orders - the minimum total of an export or overseas order must be$2500.00, this automatically qualifies customer for W.D. prices. An overseas customer can ignore this requirement if purchasing through a USA agent.

ABOUT DOWNEY PART NUMBERS...

The first letter reveals which model Toyota the product is made to fit:

R - Toyota Pickup
F - Toyota Landcruiser
A - Toyota 4WD Tercel
Y - Toyota Van
G - General, fits any application

The next four digits are the root or base number, and are assigned to a type of product. For example:

"0150" is any single tube rear bumper
"0151" is any double tube rear bumper

Any digits or letters behind the four digit root number simply describe color, year or model, side of vehicle, or special characteristics of the product. For example:
